## PORTFOLIO

### Incomee

#### Customer & Company Management System

Jan 2022 - Feb 2024

This project aims at developing a highly cost-effective "CCMS" The company/customer can select which feature they want to use and implement it by paying for that feature only. It aims to provide the company with a single application to handle all their tasks using a website/desktop app. The objective is to make the management easier for any size company.

## PROFILE

I am a full-stack developer with experience in front-end and back-end development. I have experience with various programming languages, frameworks, and tools. I can work independently or as part of a team. I am a motivated and hard-working individual who is always looking for new challenges. Loves working with new technologies; I consider myself a 'forever student' and keen to build my profession in technology and lead teams through continued coursework.

## INTERESTS
